The Covert Colonization Of Our Solar System

Synopsis

In the "Covert Colonization of Our Solar System" is revealed how the military Industrial Complex of the U.S. was taken over by the same Nazis brought in after World War II in "Operation Paperclip". This takeover, among other things, resulted in a large scale "Black Project" colonization of our solar system, using antigravity technology developed by the Germans before and during World War II and developed further with help from extraterrestrials which the Germans had formed alliances with. The scientific principles of how this antigravity and free energy technology works is also discussed. Full disclosure of all this is scheduled to happen in the near future.

Book Information

Paperback: 174 pages

Publisher: Outskirts Press (February 9, 2016)

Language: English

ISBN-10: 1478768835

ISBN-13: 978-1478768838

Product Dimensions: 6 x 0.4 x 9 inches

Shipping Weight: 7.5 ounces (View shipping rates and policies)

Average Customer Review: 4.1 out of 5 stars [See all reviews](#) (7 customer reviews)

Best Sellers Rank: #535,815 in Books (See Top 100 in Books) #193 in [Books > Politics & Social Sciences > Politics & Government > Specific Topics > Censorship](#) #19327 in [Books > History > World](#) #50286 in [Books > Science & Math](#)

Customer Reviews

This book is a follow up on Herbert Dorsey's "Secret Science and the Secret Space Program", with a lot of new material added. In the chapter on Scalar Physics, the mathematical theory connecting gravity with electromagnetism is developed and goes on further to explain how portals allowing teleportation and time travel can be made electromagnetically. The Nazi International documented in Joseph Farrell's book by the same name, seems to have taken over the U.S. military industrial complex to produce space faring technology to colonize the solar system. A good read from many different angles.

I'm a Boomer. I was born in 1948. Since I was in Jr high I've been interested in ufos and I've waited 60+ years for the government to tell us the truth about ufos and aliens. While we're still waiting for the US Government to go on TV and tell the whole story, the information in this book will have to

suffice for me for now. I don't want to spoil this book for you by giving away the contents in this review. So just buy this book and study it in depth. I ensure you that your eyes will be opened. I only wish that Mr Dorsey had more space to expand on all of the information he presents in this volume. If this information is all true or even partly true it's a game changer. Perhaps the best way to inform the citizens of the world about what's going on "out there" would be to turn this book into a multi-volume screen play and use that to make a series of movies like has been done with Star Wars and Star Trek. Only these movies should be documentaries not Holley wooded with fiction. The world needs to know what's been going on.

This book was very enjoyable and informative to read as both a follow-up to Herbert Dorsey's earlier book on the earth-based secret space program and as a more comprehensive survey of the history of UFO and anti-gravity technology. That history includes both the early German efforts led by Maria Orsic and the Vril society, as well as the most recent whistleblower revelations by Randy Cramer, Corey Goode and others. It even attempts to present a summary of the scalar/vector mathematics involved in anti-gravity propulsion, though as a graduate electrical engineer I have not yet been able to visualize the mechanization of that math in the descriptions of the various successful technological implementations. (But then I could never quite grok tensors.) That having been said, the level of technical description and explanation contained in this book is quite high. This probably reflects the fact that, according to Dorsey's autobiography, he too was awarded a bachelor's degree in electrical engineering, though he never used it in a formal way due to his principled refusal to work for companies involved with defense contracts.

This is a very interesting book and one I hope is true. The World that we could have after full disclosure would be a great place to live. Technology is becoming better all the time but it appears we only are allowed to see the tip of the iceberg.
