Customer Reviews

I drive trucks for a living. Years ago, the Thomas Guide was a required tool that one needed in their arsenal when making deliveries both short and far. Nowadays, many of us have evolved with technology. Let's get real, GPS has made it a lot easier and a lot more convenient. However, there are times when one will have no reception, a dead battery or may not even have a phone on them when they really need it. Even if all is working, sometimes the application's map data may not reflect the reality. In these times, a Thomas Guide will always save the day. I keep one in the back of my truck in the event that these situations occur, and trust me, they have. I urge everyone, especially the young, to learn how to use a Thomas Guide. If you can learn how to navigate with it, you will have no trouble getting around. Don't place your trust completely in technology. Always have a backup.

I purchased this as a gift for my Dad. These are timeless! He is someone who would prefer to look at a map instead of use GPS. As always, Thomas Guides are the best! So many things have changed over the years with all of the construction in the OC/LA area, so this new edition was perfect timing. The quality and detail are awesome! Highly recommend!

Google maps just does not do justice to this 90 mile wide county that is Los Angeles. It's a fat heavy spiral bound book but it's a big, big city. The one weakness is, it should have a one page freeway map somewhere. Bad that the spiral splits the two page freeway map in the most important intersections.

I decided to purchase the new Thomas Guide since I always liked the traditional map approach. MapQuest online is okay for quick directions but I like to look over a good hard copy map to get a better feel for directions. It helps me better understand travelling through Orange and LA Counties. I don't have GPS but that is fine with me. Thank you Thomas Guide/Rand McNally for continuing to provide the best road map for all these years. It is an extremely valuable resource in my opinion. The map coloring and presentation with the spiral binding is excellent.

It is sad to hear that the Thomas Guide is not published more often. People need not only a small unreadable app when they are seeking driving directions, but they also need a hard-copy up to date guide they can hold and follow the roads. Less eye strain.

Thomas Guide Book is Awesome!!! You don't have to wait for a signal or recalculating like a cell phone. In the mountains, desert, hills Or in the city... Thomas Guide gives me a page of the map city. I have options to directions and see, then on your cell phone.

Because I have yet to use a gps that will show you nearest major cross street or all of you options at getting around the accident, latest freeway shooting, house burning down, or marathons running through downtown Los Angeles. I hope that they don't stop printing these!

I have been using Thomas Maps for years and this is the one and only. Only regret is I can not find a San Bernardino/Riverside County current map book.
