Menopause And Homeopathy: A Guide For Women In Midlife

Synopsis

As women grapple with the issue of whether hormone replacement therapy is necessary for them, they need a greater understanding of what the body is undergoing in menopause. Dr. Ifeoma Ikenze, an M.D. and a homeopath, writes from her experience of treating women daily in her Northern California practice. She explains the changes that begin to occur in the female body after thirty-five, and how homeopathy can help. Using patient cases as examples, Dr. Ikenze shows how physical, emotional, professional, and spiritual problems can challenge one's health and self-image. She incorporates the latest medical research and addresses the spiritual and emotional challenges of menopause, which most physicians overlook.

Customer Reviews

Homeopathy is a versatile form of natural medicine that offers people the tools to take care of many different conditions and ailments. Menopause, is not an ailment, but rather, a natural milestone in a woman's life. Dr. Ikenze gives information about the hormonal changes in a woman's life as well as the various approaches that are available currently to treat the unpleasant symptoms that some women experience. Homeopathic remedies, diet, supplements, vitamins and exercise are all discussed as viable options for a woman who may or may not be on hormone replacement therapy.

The author deals with menopause in an intelligent, compassion manner. Great book and great resource!
