The reviewer that put 5 stars, really said "HARD TO STUDY"So he made a mistake when he put 5 stars. And that is what I am emphasizing here "HARD TO STUDY"I am a math tutor in a college and I just cite a problem that starts with somethinglike this "Lets throw 30 times two four sides dice...""TWO FOUR SIDED DICE " ???? (Dice are little cubes with SIX sides!!!)And really they mean that. because themaximum sum you could have is 8.Why to use a never seen object in a begginer math book. ?There are many more examples difficult to grasp for a begginer. Also the explanations at the end of the book are difficult to follow for a begginer.

I gave it to our Spanish speaking student. I have not talked with him about the book

It came new and wrapped. I couldn't be happier. Thank you. My student will enjoy it.

A good helper easy to understand,

a lot of mistakes

It was good.

Excellent
