Customer Reviews

I understand that any negative review amongst this sea of praise is likely to be met with skepticism, so let me first say that, yes, I have read the entire book, and yes, there are some good points to it. Indeed, I admire anyone who, having found answers and relief, is motivated to share this information with others. The authors certainly have done extensive research and no one could accuse them of not being thorough in this 400 page, well referenced tome. In addition, amongst these pages are literally boatloads of good advice!

Synopsis Review: I found this book extremely depressing & unfocused, with far too much extraneous information of questionable value. In addition, I believe that the authors may be deliberately attempting to deceive the reader about their

credentials, and lifted too much material from other sources. Perhaps most distressing, however, are the long chapters on every conceivable new-age alternative therapy and the campy tone of pseudo science that prevails, which will undoubtedly reinforce the medical community's views of FMS & CMP as "fad" or "yuppie" diseases. My recommendation: Get Clair Davies excellent "Trigger Point Therapy Workbook" as a start. It is everything that this book is not - Very focused, empowering, and immediately applicable to help you start feeling better NOW. In addition, Davies is such a consummate perfectionist that, though he isn't a doctor, (and says so up front) he clearly has acquired detailed knowledge of Anatomy which may even surpass that of many in the Medical community. Full Review: Now, let me discuss some of the reasons why I titled this review "Greatly Disappointed."
